CD33 is a function rich CMOS laser sensor designed in an ultra-compact housing

...ates space-saving as well
...quired and thanks to the
...ideal for installations on

...processing

...les one pixel into small
...urate measurement by
...e of incoming light.

...electronic shutter

...hutter controls to keeps a
...reflection.
...ble peak level detection
...e conditions exist.

...odels between voltage and current output.

...sors to be very complicated requiring long set-up times and many buttons to operate.
...r set-up by separating voltage and current output models into two types.

Ideal for robot mounting

Ideal for mounting on robot cylinder thanks to compact dimensions and the light 65g weight. IP67 water tightness is also secured.

Easy operation

Just two buttons (SET and SELECT) are enough to set and operate. LED indicator shows which function you are setting.

2CH outputs enables individual setting of measurement range.

Highly accurate comparator output capable of identifying $12\mu\text{m}$ (with CD33-30 types). Hysteresis is just 0.15% F.S.

MF (Multi Function) input for further convenience.

The programmable remote MF input can be set to one of the following: Laser o, External teach, Hold, or One-shot trigger.
